## TROUSDALE

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

### Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Women in Trousdale County earn, on average, \$ 6,000 less annually than their male counterparts. However, Trousdale still ranks in the top 15 counties for the wage gap indicator.
- ◇ Women in Trousdale County are 9 percent less likely to participate in the labor force than women in nearby Rutherford County. Women still make up 45.3% of Trousdale County's work force.
- ◇ Trousdale County ranks in the top 15 counties for female unemployment rate (4.4%). The overall county unemployment rate is 3.4%.
- ◇ Among all working individuals, 18.7% have jobs in managerial or professional fields, but when only female workers are considered, that number increases quite significantly to 28.7%.

### Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ There are over 1,000 women in the county who did not graduate from high school. However, higher percentages of women than men have a high school diploma in Trousdale County: 61.4% of all residents have a high-school level degree.
- ◇ Only 7.2% of females in Trousdale County have a four-year college degree while 8.9% of all county residents have such a degree.
- ◇ Trousdale ranks in the top 20 counties in percent of all businesses that are women-owned (45.6%), female high school dropout rate (4%), and percent of women earning below the poverty level (13.3%).
- ◇ 24.3% of families with a female householder and no husband present live in poverty in Trousdale County; 9.7% of all families are in poverty in the county.
- ◇ Despite making up almost 46 percent of privately-owned businesses in Trousdale County, women-owned businesses only account for just 7.2% of the total sales and receipts of private firms in the county.
- ◇ Of eligible voters in Trousdale County, 52.7% are women. 5 out of the 27 elected county officials are women.

# ABOUT THE COUNCIL AND THIS REPORT

Trousdale County

*The Status of Women in Tennessee Counties* report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
